

Equipment name	EL tester	Model	EL- 2400
----------------	-----------	-------	----------

REOO

Dimensions	2600mm * 1900mm * 740mm	Price	USD18460.00/set
------------	-------------------------	-------	-----------------

Electroluminescent inspection for detect solar panel before laminating and after laminating. To check solar panel of secluded split, cracked cell, rosin joint, wire break and other defects. Can testing module: 2400mm x 1400mm or 2200 x 1200mm. Depend on customer needs .

Maximum current: 10A, Maximum voltage: 60V

Include: Cabinet (Include infrared camera) + Computer + Software

Pixel: 24 million

Time of exposure: 0.1 S-25.5 S Adjustable

Power: 220V 10A or customize.

Working environment temperature : 10 - 30 °C

Humidity: 20 - 70%

Main function of characteristics:

By using images can find: material other defects. the sides of the pneumatic feeding short, art and craft contamination

Testing fast and convenience was longtime 1s - 25s (adjustable)

Power consume : 0.5 KW

Compressor air : 0.6 Mpa, 10L / min.

Guarantee and after -sale service

One year guarantee for whole machine except of consumable..

24 hours technical support by E-mail, Skype or QQ..

Calling or door-to-door service

Ues-friendly English software, user manual and detailed Video/CD.

Note:

1, Payment: T/T 50% deposit and balance before shipment by L/C or T/T.

2,The price include exported standard package.

3,The price do not include the cost of installation, buyer will pay for our engineer's return tickets, accommodation when our engineer go to install, train for machine in buyer's place.
