

Testing Kit Charging Machine

This equipment can realize the robot automatic installation tools, guide the accurate installation of the manipulator by the visual positioning system.

Model	RO-GZS02
Working power	AC380V 50HZ 3phase 5 line
Power	25KW
Working air pressure	0.5-0.7Mpa
Installation success rate	More than99%
Tact	20s
Applicable module type	Minimum2050*950mm, maximum 2500*1400mm
Camera type	Area array / Line scan, HD camera
Manipulator load	More than10 kg (subject to actual on-site conditions)
Module positioning mode	CCD lens photography detection
Camera visual range	More than500mm*400mm
Camera Shutter mode	Electronic shutter
